

Poster: Helpful hints for summer vacation!

Activity Description

Content & Goals:

This exercise refers to the introductory story and the four friends' behaviour in terms of sun exposure. Especially shortly before summer vacation, the sun protective measures should be brought to the awareness of the pupils again. The pupils develop (in teams) posters for their schools and give advice to their fellow pupils about sun protection measures during vacation. During these activities, they will deal actively with adequate sun protection and explore alternative free time activities during vacation time.

Realization:

- Can be integrated into classroom lessons
- Cross-disciplinary goals are possible (English, Biology, Art Education; Computer Studies / Data Processing / Word Processing)
- International links are possible.

Variations:

Team work; poster design

Requirements of material and media:

- Learning text of the learning module
- Material for poster design
- In computer-assisted realizations: adequate visual and word processing programmes

Time requirements:

- **Preparation time:** low time need (up to 1 hour)
- **Need of class time:** at least 1 double period (90 mins.)
- **Wrap-up time:** low time need (up to 1 hour)

International Links

The pupils present the self-designed posters to each other in English. In addition, they can present the sun protection campaigns they found in their respective countries and discuss them with each other. The focus could be on the question if there is a difference in intensity in which the various countries promote sun protection and what might be the reason for this difference.

The activity is based on the texts in the learning module, the posters created by the pupils and the pupils' research on the sun protection campaigns in their countries.
