

# STD Event: Knowledge is pleasure

(Methodological suggestion by Dubravko Lepušić, MD from Croatia)

## Activity Description

### Content & Goals:

The subject of sexually transmitted diseases (STD) respectively the protection against STD is supposed to be brought to the teenagers' attention in a surrounding that is motivating and adequate to their lifestyle and way of learning. For this purpose, a school event is organized to which all teenage students are invited. In appropriate school rooms educational evening lectures are held by a medical expert on the subject of STD (general introductions and lectures with varying focus, e. g. on HPV). The lectures are followed by rock concerts featuring some checked out rock groups, e. g. students' groups. The event aims at broadening the teenage population's knowledge about STD and at informing them about sexual hygiene and the prevention of STDs.

### Realization:

- Short lecture (40 min up to 1 hour) followed by discussion. The lecture is held in the form of a power point presentation.
- Rock concerts following the lecture (as a means to enhance interest in the event).

### Variations:

After the lecture / during the days following the lecture: group discussions, creation of web sites and posters, scene performances, lectures on STDs held by teenagers.

### Material and media requirements:

- Suitable rooms
- Power point presentations
- Website presentations
- Scene performances
- Information flyers about sexually transmitted diseases, the ways of transmission and prevention strategies (search for material e. g. in government-funded health institutions).

### Time requirements:

- Lecture: 40 minutes up to 1 hour
- Discussion: additional 20-30 minutes
- Scene performances: ca. 20 minutes
- Concert: varying
- The project „Knowledge is pleasure“ may happen once or can be offered at regular intervals throughout the whole school year.
